# INTRODUCTION

Pegasus Paradise provides a wide range of sanitary ware products for different market segments. Our strength is the diversity of sanitaryware in stock and our ability to source for sanitary ware that are unavailable in stock, thus we are able to provide and save the customer's time in multiple sourcing.

Our company offers imported items featuring the latest design. Simultaneously, it is an enterprise which pays great attention on quality assurance and more perfect after-sales service. Pegasus Paradise, your bathroom inspiration.

## INTRODUCTION

私達はジェットバスのメンテナンスを生業として1985年に創業いたしました。その後、約30年間にわたりバスタブの自社製造や日本独自のユニットバスの開発を行ってきました。温泉を含めてお湯に浸かるという日本古来の文化と、リラクスのための入浴という海外の文化の。融合を意識しながら新しいバスライフのスタイルを追求してまいりました。

2006年には新機能であるマイクロバブル発生ユニットを発売して新しい市場も開拓いたしました。2015年は後発ながらペットサロン向けの人工的に二酸化炭素を溶けこませた炭酸泉シャワーの販売にも着手いたしました。炭酸泉はヨーロッパでは古くから治療や美容に活用されております。

今後はこれらの技術を活用して、私たちの最も強力な仲間であるペガサス社と共に東南アジアの市場に。合った商品開発を行い、皆様が快適にバスライフを送れるようご提案してまいります。

Founded in 1985, we started as a maintenance company for jet baths. Since then, we have manufactured bathtubs and developed original unit-bath systems in Japan for over 30 years. We introduced a new bath lifestyle that integrates the traditional Japanese culture of soaking in hot water just like a hot springs 'onsen', with the popular Western culture of a relaxing bath.

In 2006, we pioneered a new market with micro-bubble generating technology. In 2015, we have launched CO2 injected carbonated shower unit for pet salons. Carbonated water has been used for traditional medical and beauty treatments in Europe.

We are now expanding to the Southeast Asian market, in alliance with a strong partner, Pegasus Paradise Sdn Bhd to develop new products suitable for the market by fully utilising our technologies. We aim to provide a comfortable bath lifestyle for you.

# Microbubble

*Microbubble Beauty esthetics bath*

With one switch, the hot water in your bath becomes milky.

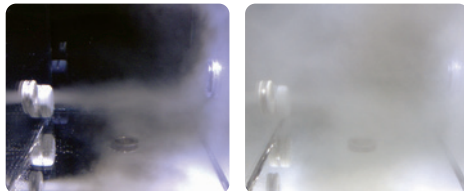

For safety purposes, this product has acquired the PSC mark as mandated by the Japanese Ministry of Economy, Trade & Industry. However, please take note that there is a similar product that has not acquired the PSC mark.

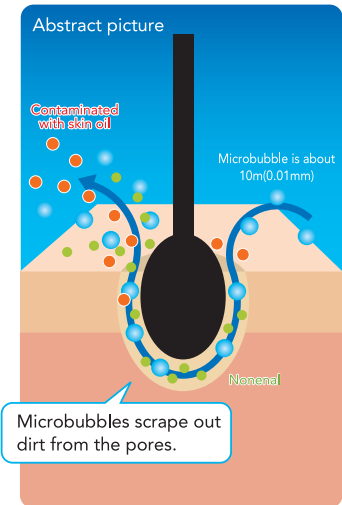

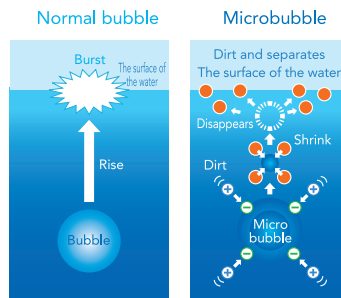

## What is a "microbubble"

"Micro" is the unit of size, 1 $\mu$ m is 1/1,000mm.  
 Ultrafine bubbles made from water and air are called "microbubbles".  
 Milliunit bubbles will rise to the surface and burst, but bubbles of micro units will float in the water, shrink and disappear after a few minutes. Hot water will be the emulsion for it.

The surface of the bubble is a negatively charged electron, so it has a strange characteristic of attracting dirt and dirt-tinged ions take on an electronic positive.

TAKESHITA's microbubble raises a large capacity of 4 - 12  $\mu$ m excellent bubble, it is minimum grade.

| Size of microbubble   | Comparison with other company               |                             |                                |
|---|---|-----------------------------|--------------------------------|
|   | TAKESHITA's microbubble                     | Other company's microbubble | Hot water system's microbubble |
| <br>Normal bubble is about 2mm<br><br><br>Size of a pore is about 0.2mm<br><br><br>Microbubble is about 10 $\mu$ m (0.01mm) | Comparative chart of bubble<br>4~12 $\mu$ m | 20 $\mu$ m                  | 60 $\mu$ m                     |
| Output chart (per minute)   | <br>14 $\ell$ /min                          | <br>8 $\ell$ /min           | <br>8.5 $\ell$ /min            |
| Electricity expense   |   |                             |                                |

Note: It has cleared the primary noise grade in condominiums and hotels, you do not have to worry about the noise transmitting downstairs or to the next room.
